ABOUT MYSELF

I am a third Year BSc Computer Science student from Stellenbosch University, working to graduate at the end of 2026. I matriculated from Durbanville High School in 2023 and started working towards my degree the following year.

I have always had an interest in computers and STEM. I find problem solving fun and extremely rewarding, especially when it results in me learning something new. I am hard working and do my best at everything I commit myself to. I believe that what you put in is what you will get out of life. Nothing comes by itself; there are no shortcuts in life. You must work hard to achieve your goals.

I see myself as an easy-going person with good relationships with my Lecturers, fellow students, family and other people around me in daily life.

As for the future, I am considering doing my Honours in Computer Science at Stellenbosch University in 2027, but this is not yet confirmed. Therefore entering the work force is also a possibility.

EDUCATION

Stellenbosch University	Stellenbosch, South Africa
<i>Bachelor of Science in Computer Science</i>	2024 – 2026

Mark To Date: ¹ 73.71%

Degree Stream: General Computer Science. As elective modules I mostly chose Applied Math and/or Operations Research. ²

Durbanville High School	Durbanville, South Africa
<i>National Senior Certificate</i>	2019 – 2023

NSS Results: 88% Average, with distinctions in all 7 subjects.

Notable Achievements during secondary education:

- Academic:
 - Information Technology (IT) | Best mark in year 2023
 - Merit award for A-average 2019 – 2020
 - Academic Colours for A-average 2021 – 2023
- Leadership:
 - Member of the Student Council 2023
 - Mentor for four grade 8 boys 2023
- Other:
 - Judy Potgieter Trophy | For leaving a lasting positive impact 2023
 - Merit award for senior Technical Team Member 2021 – 2023
 - Received Black Belt (Sho-Dan or 1st Dan) for Judo 2021

EXPERIENCE

Gendac	Cape Town, South Africa
<i>Student Vacation Work Internship</i>	Two weeks in Jan 2026

- Worked in a team with two other interns to build a Habit Tracker mobile app.
- Used C#, .NET MAUI and ASP.NET Core.
- Improved my teamwork and communication skills.
- Experienced the real-world events of a developer in the workplace.

Durbanville High School	Cape Town, South Africa
<i>Technical Team Lead</i>	2020 – 2023

- Managed a team of roughly 10 students, alongside a fellow team lead, for school events.

¹Final mark for my degree as of academic records available in May of 2026.

²Please see my attached academic record and the [science faculty yearbook](#) for more information on elective modules.

- Hired privately to plan, facilitate and lead all technical aspects of events for clients using the school's various venues. These events include shows for well-known artists, bands and other public figures.
- Hired by the school to collaborate with professional technical teams as the representative for the school's 800 seat auditorium.
- Toured nationally with the School Theater group as the sound operator, receiving various awards for my work at festivals.

Community Service

Various

South Africa

2019 - present

- Volunteer Sound operator at churches.
- Qualified technical official for Judo SA.

PROJECTS

• Casecompare³ | Python, SQL

Casecompare provided an easy way for students to compare the outputs of their implementations of the 2024 First Year Computer Science project, without their code ever leaving their computer. Lecturers encouraged students to test their outputs against each other, but this proved to be a logistical nightmare. Casecompare had two parts: A backend Discord bot (written in Python with an sqlite database) to gather outputs and testcases from students, and a Python script that spoofed the randomness of the project and locally ran testcases against a students code.

TECHNICAL SKILLS

- **Languages:** Java, Python, C, C#, SQL, MATLAB, x86 Assembly, Basic HTML/CSS.
- **Frameworks & Tools:** Git, .NET, Tailscale, NumPy, Scipy, Simpy, Matplotlib, NeoVim, VScode, VisualStudio, Basic L^AT_EX.
- **Environments:** Git, Ubuntu Linux, Windows, Proxmox VE, Docker.
- **Basic Numerical Analysis:** Skills taught in the Stellenbosch University Applied Math 324 course.

SOFT SKILLS

Dependability	Long - standing track record of exceeding expectations while meeting deadlines.
Logical Thinker	Strong Problem Solving skills and the ability to find innovative solutions. Strong decision making skills. Fully computer literate.
Collaboration	Ample experience working in teams at University and Vacation work (including collaborative coding).
Life Long Learner	I enjoy learning new skills and firmly believe there is always more to learn.
Reliability	Can function well under pressure. Honest and Loyal.
Flexible	Can easily adapt to different situations, such as quickly switching languages and paradigms.

INTERESTS/HOBBIES

- **Homelab:** I enjoy tinkering with computers and networks, and I self host many services for the fun of it.
- **'Edutainment':** (Educational Entertainment in STEM fields or documentaries.) The majority of the content I consume has some sort of educational element. Think [Veritasium](#), [Fern](#), [Steve Mould](#), ect.
- **Hiking:** Occasional casual hikes with friends to experience the wonders of our country.
